

VDB Netmeeting

Stap 1

Start VDB Netmeeting.

Er verschijnt een inlogscherf. Vul nu in het vakje achter Session number het door de Organisator (Moderator) doorgekregen vergaderingsnummer in.

The screenshot shows the 'netviewer one2meet' login window. It has a red header with the logo and text. Below the header, the title is 'Start session'. The main text says 'Please enter the access data provided by your moderator.' There are two input fields: 'Session number:' which is empty, and 'Your name:' which contains 'sysadmin'. A 'Connect' button is located below the fields. At the bottom right, there is an 'Exit' button with an information icon.

Stap 2

Je moet nu bevestigen dat de Organisator (Moderator) wil meekijken.

The screenshot shows a warning dialog box from Netviewer. The title bar reads 'netviewer Van Den Bosch Transporten BV'. The main text says 'Your screen content is about to be transferred.' followed by 'Notice: Session being recorded.' There is a 'Select...' button. Below that, there is a checkbox labeled 'Never ask me again' which is currently unchecked. At the bottom, there are 'Yes' and 'No' buttons.

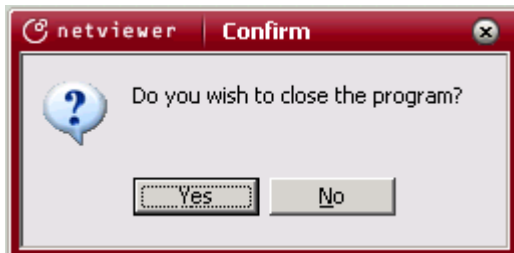

De sessie is nu gestart. De Organisator ziet nu je scherm.

Dit kan via de optie Show/Watch geswitched worden, zodat de Participant het scherm van de Organisator ziet.

Stap 3

Netviewer sluit je af met het kruisje rechtsboven. Het onderstaande scherm verschijnt.

Klik op Yes.

Stap 4

Klik daarna in onderstaand scherm op Close.
